DETAILED ACTION

1. Claims 1-34 are pending in the application.

Election/Restrictions

2. Restriction to one of the following invention is required under 35 U.S.C. 121:
 - I. Group I, claims 1-24, drawn to device driver communication, classified in class 719, subclass 321.
 - II. Group II, claims 25-26, drawn to event handling, classified in class 719, subclass 318.
 - III. Group III, claims 27-32, drawn to access locking, classified in class 710, subclass 200.
 - IV. Group IV, claims 33-34, drawn to object oriented messaging, classified in class 719, subclass 315.
3. Inventions Group I, Group II, Group III and Group IV are related as subcombinations disclosed as usable together in a single combination. Group I is drawn to a driver framework component comprising a presentation component that selectively exposes adapter objects to a driver. Group II is drawn to event handling, more specifically, managing and serializing of events between highly threaded software operations and lower threaded software operations. Group III is drawn to adapting an object with one or more locks such as an internal state lock and a presentation lock and hierarchically controlling the locks. Group IV is drawn to communication with an object via a handle. The subcombinations are distinct from each other if

Art Unit: 2194

they are shown to be separately usable. In the instant case, inventions Group I, Group II, Group III and Group IV has separate utility such as the search for Group I invention is not required for Group II, Group III or Group IV invention and vice versa. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A complete response, whether with or without traverse must include the withdrawal of all non-elected groups of claims.

6. No telephone communication was made due to the complexity of this requirement for restriction. See MPEP 812.01.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Qing-Yuan Wu whose telephone number is (571) 272-3776. The examiner can normally be reached on 8:30am-6:00pm Monday-Thursday and alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Thomson can be reached on (571) 272-3718. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
